Applicant's election with traverse of Group I, claims 1-54 in the reply filed on April 28, 2005 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner. This is not found persuasive because there is a serious burden on the Examiner. These inventions have acquired a separate status in the art because of their recognized divergent subject matter. The search require for Group I is not required for Group II.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-54 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Jury et al (EP 0781510).

Jury et al (EP 0781510) teach a cultured dairy product comprising yogurt and chocolate or any flavor fat-containing confectionery material (see entire document; especially column 2, lines 54-55; column 3, line 47 to column 4, line 8; and claims 1, 3, and 4).

Art Unit: 1761

The claims appear to differ as to the recitation of pH and A_w .

The claimed pH and A_w would be inherent and/or obvious to that of Jury et al as the same components are used. It is further noted that the confectionery material cited by Jury et al are the same as that claimed (see column 2, line 46 to column 3, line 13).
